

CELEBRATION OF
Excellence
REPORT 2022

Love • Laughter • Learning

Principal's Report

Ms Kate Mortimer

Welcome to the 2022 edition of our Celebration of Excellence Report.

I am pleased to be able to provide you with the 2022 Celebration of Excellence Report which highlights the outstanding academic and cultural achievements of our students throughout 2022. These impressive results speak not only to the hard work and dedication of our students but also to the nurturing support they receive from their rich learning environments – both at College and at home.

Whilst recognising traditional academic achievements is a valid and valued facet of College life, it is important that we view success not only in terms of grades or exam results. I fundamentally believe that success and achievement can look like many different things for different students. When students can see their own progress in learning and mastering a subject or skill, they will feel a personal sense of achievement. These personal academic achievements are equally worthy of recognition and celebration.

At Sheldon College, we value and recognise the progress made by each of our students throughout the year. This progress is evidence of students who have made the most of every opportunity, acted with purpose and shown tenacity and creativity.

It is also evidence of the purposeful implementation of our guiding philosophy of Love, Laughter and Learning. By building strong relationships with their teachers and peers students are motivated to think bigger, learn harder and reach higher. Through trying, succeeding, and sometimes even failing they edge closer to reaching their potential. Every student who has made progress with their learning this year should feel proud. Please take the time to read this report and join with us in acknowledging the remarkable achievements of our students.

Acting Director of Teaching and Learning

Academic Report

Across Preparatory to Year 12, Sheldon College's fundamental philosophy of Love, Laughter, and Learning is at the heart of everything we do and who we are. In Academics, this is achieved through our firm commitment to excellence in teaching and learning, underpinned by a strong foundation of wellbeing. This ensures that all our students have the optimal school environment to progress, achieve, and flourish.

Excellence in Learning

It is evident daily in classrooms and across the College that student learning is engaging and meaningful, allowing students to acquire, deepen, and transfer their knowledge, understanding, and skills. In 2022, our College's Excellence in Learning achievements include:

- More deeply and intentionally engaging with a quality and viable curriculum (Australian Curriculum and The Alice Springs Mparntwe Declaration) using inquiry questions and meaningful cross-curricular links.
- Knowing and growing each learner at the appropriate level of challenge through data and differentiation.
- Focusing on high-impact teaching strategies such as proactive classroom management, differentiation, learning intentions and success criteria, explicit teaching, modelled examples, collaborative learning, questioning, multiple exposures, metacognition skills, and ongoing formative assessment.
- Designing a seamless Literacy curriculum to consolidate spelling practices, deepen reading approaches, and introduce more effective writing strategies.
- Continuously engaging with Junior and Senior Learning Centres to promote academic scholarship and a love of language and literature including the development of our online virtual library.
- Streamlining the identification and support of students with diverse learning needs (Gifted, EAL/D, and learning difficulties) through targeted differentiation, adjustments, and where needed, a thorough Review and Response process as well as the creation of a Head of Learning Enhancement role commencing in 2023.
- Continuing to provide quality literacy intervention supports through our Lit Club and other literacy support programs while introducing additional numeracy intervention supports.
- Auditing and reviewing formative and summative assessments to allow students multiple opportunities to demonstrate, and build on, what they know, can do, and are able to apply.
- Developing an assessment initiative to support students to better interpret and dissect questions and develop a range of strategies such as inking their thinking, typing more quickly, and mastering multiple choice considering NAPLAN has moved online.
- Developing the Ready. Set. #SheldonPrep! and Year 6 into Year 7 transition programs to ensure a smooth, seamless transition at key College junctures.
- Leveraging emerging technologies and innovations through the creation of innovation projects and initiatives that explore virtual reality, multimedia, design thinking, creativity, and problem solving.
- Developing iLINQ learning and assessment materials for flexible curriculum delivery beyond the classroom using online textbooks and various learning platforms.
- Ongoing online and face-to-face positive home/school partnerships and engagement through signature events such as the Prep Fairytale Ball, Year 1 Spring Spectacular, Year 2 Poetry Exhibition, Year 3 Travel Expo, Year 4 Design Day, Year 5 Agents of History Expo, and Year 6 Natural Disasters.

- Incursions and excursions which bring real-world contexts to our students' learning – Year 10 Humanities excursion to Minjerribah, Drama, Dance, and Visual Art excursions QPAC and GOMA, Year 9 Business Education Market Day.
- Preparing Year 11 and Year 12 students to be active academics through organisational skills, homework strategies, and by asking questions in class.
- Pathways opportunities (traineeships, TAFE @ School, Certificate and Diploma courses) that meet the personalised needs of our students.
- Offering extra-curricular enrichment opportunities which extend and develop student learning outside of the classroom including Titans and Titans Junior, support tutorials, chess, debating, various University essay and speaking competitions, E-Sports teams, UQ Science Ambassadors and community service groups.

Excellence in Teaching

Quality learning takes place when the College places a strong emphasis on excellence in teaching. A key point of difference to the success of our students at Sheldon is undoubtedly the high calibre of our teachers. Sheldon College teachers should be admired and recognised for the excellence in their dedication and passion for providing quality educational programs for the students in their care. It is for this reason that we invest heavily in professional learning. In 2022, our College's Excellence in Teaching achievements include:

- Engaging teachers with individual teacher professional learning plans through coaching and mentoring for teacher goal setting and action that is drawn from student needs and priorities.

- Introducing Professional Learning Communities (PLCs) which allow teachers to deepen their understanding of current student priorities collaboratively. PLCs 2022 include Upper/ Lower Writing; Spelling; Coaching/Mentoring; Numeracy Fluency; Academic Talent Development; Staff Wellbeing; Differentiation in the Classroom; Providing Feedback on Learning; Pedagogy; and Creative Thinking.
- Building quality initial orientation, induction, and support processes for new and early career teachers.
- Endorsing staff with their provisional to full teacher registration in alignment with QCT's guidelines.
- Supporting 13 staff with applications to QCAA for casual work as Endorsers, Confirmers, Markers and Syllabus Writers at various levels and for a variety of Senior Subjects.
- Sharing and celebrating pedagogical practices through Learning Walks and Talks, and Watching Others Work initiatives.
- Deepening teacher knowledge and building expertise through micro-credentials- UNSW Certificate of Gifted Education.
- Engaging staff in the professional learning required by ACARA to deliver NAPLAN online.
- Presentations by staff at State and National conferences organised by professional teaching associations about Physical Education in the primary school, Portfolio based learning, Language learning and 21st century classroom practices.

Wellbeing Foundation

At the heart, we acknowledge that student, teacher, leader, and community wellbeing is the foundation for optimal learning and growth. In 2022, our College's Foundation of Wellbeing achievements include:

- Prioritising student wellbeing lessons and activities in classroom timetables, the introduction of Wellness Wheels to engage with student voice and needs and integrating wellbeing themes in learning experiences.
- Appointing a School Psychologist to support student social/emotional needs.
- Investing in teacher wellbeing through a team culture of care, connection, collaboration, and capability building as well as targeted wellbeing professional learning opportunities and supports.
- Rewarding and recognising teacher expertise and experience through Senior Teacher status and extensive nominations for the Queensland College of Teachers - TeachX Excellence in Teaching Awards.

There is much to celebrate with Sheldon College's 2022 learning and teaching initiatives and achievements. This success could not be achieved without the ongoing positive and proactive support of parents and the wider College community.

'Coming together is a beginning, keeping together is progress, and working together is success' Henry Ford.

Young Alumnus of the Year Award

Milly Bannister

The Young Alumnus of the Year Award recognises a Sheldon College Alumni who has significantly created positive change in the broader community, through demonstrated excellence and continuous improvement in their chosen field of endeavour. The 2022 Young Alumnus of the Year is Miss Milly Bannister.

After graduating in 2014, Milly went on to study a Bachelor of Media and Communications majoring in Journalism at QUT. As part of this, Milly studied abroad at San Jose State University in California, furthering her knowledge of journalism, communication and media studies.

Upon returning home to Australia, Milly's focus shifted from her online social media platform to that of exploring options to positively impact young people, their wellbeing and mental health. Milly undertook further study with a Diploma of Positive Psychology and Cognitive Behaviour Therapy and has used this knowledge and her vast experience in founding ALLKND, a follow up to GRLKND, a non-for-profit organisation that teaches Australia's first digital, peer-to-peer mental health first aid program, at scale around the country.

Milly has used her social media influence and partnership with brands such as Microsoft Surface and Ella Bache, to positively encourage and support young people with their mental health. Helping to change the stigma around social media and influencers and teach young people how to use it positively to connect with and support their peers.

Milly continues to engage with our current Sheldon student body, through workshops, year level presentations, and has current students involved as members and as Director of the Young Leaders Board of Directors in her business model.

Milly's service to the greater community, and demonstrated capacity for creative thinking, innovation and strong Sheldon College values in the broader community makes her a worthy recipient of our 2022 Young Alumnus of the Year Award.
