

LINQ Precinct

Faculties

LINQ Precinct Faculties

The LINQ Precinct hosts 3 disciplines of Teaching and Learning. The programs offered in the curriculum are dynamic and focus on the development of 21st Century skills.

The curriculum programs developed in the LINQ Precinct are designed to work as an umbrella of learning across all areas of study rather than acting as separate disciplines.

Therefore, courses are based in contexts and allow students to explore industries and areas of interest. This has been an evolution from the traditional approach to teaching which was predominately based on learning theory rather than the application of it.

Business Faculty – Business Education focuses on developing the entrepreneur within. Programs offered focus on providing opportunities for students to liaise with

industry and engage in real world business experiences.

Media Faculty – Media Studies is an Arts subject where the students learn about the foundations of film making and script writing while developing their ability to critique and analyse these elements.

Technology Faculty – The LINQ Precinct is home to Robotics and Design Technology workshops with digital and practical workspaces. The curriculum focuses on integrating industry software and opportunities for prototyping.
