

Year 7

My Shining Light Project

Year 7 Shining Light

Last Term our Year 7 cohort participated in the Shining Light Project. This student driven, social business initiative was a cross-curricular project delivered during English, Science and Technology lessons. On Tuesday afternoons, the students worked in the MakerSpace and the Design Labs of the LINQ Precinct to produce a marketing campaign to raise awareness for Energy poverty in our world.

The Shining Light Project was developed in order to service a social need known as Energy Poverty. Year 7 students worked as small business units, to design, construct and market a financially self-sustainable solar panel light.

At the completion of the unit, the students promoted and sold their uniquely designed

products during a tradeshow.

The aim of the trade show was to raise awareness and funds to support their partnered organisation,

Pollinate Energy. Pollinate Energy bring life-changing products to millions of people living in poverty in India's urban slums.

Year 7 students presented a cheque to Pollinate Energy, in total the student project raised funds of \$853.50
